

SARAH OFF THE GRID– EPISODIC DESCRIPTION/SOURCING GUIDE

SEASON 2, EPISODE 6 – DESIGN TWICE BUILD ONCE

Logline: *The interiors of Sarah’s off the grid vacation rental are finished but the exteriors are a whole other story. Sarah needs to find a way to bring curb appeal to this century home – and do it on a shoe string.*

Synopsis: This house came with a gift with purchase: a small two storey barn in the backyard. A major makeover barn wasn’t part of the original plan or budget so Sarah will have to use every thrifty trick in the book to create an indoor playground for rainy days and an al fresco dining oasis. Alex puts his finishing touches on the money saving off the grid elements in the home, and Sarah and her mom take on the landscaping.

The local community has taken a huge interest in the project since day one and they are dying for a look at the finished product! As the house is finally ready to hit the rental market, it’s time for Sarah to host an open house for her new neighbours.
